ABOUT THE PROGRAMME

The corona vaccination plays major role in preventing the spread of corona. These antibodies help your immune system fight the virus if you happen to be exposed, so it reduces your chance of getting the disease. CDC recommends everyone ages 6 months and older stay up to date with their vaccines, which includes everyone 5 years and older getting boosters if eligible, for the best protection against COVID-19. People who have certain medical conditions or who are taking medications that weaken their immune system are at increased risk of severe COVID-19 illness and death. Additionally, their immune response to COVID-19 vaccination may not be as strong as in people who are not immune compromised. People who are moderately or severely immune compromised have specific recommendations for COVID-19 vaccines, including boosters.

OUTCOMES

After completion of the programme, students will be able to

- Understand the spread of corona virus.
- Implement the practice of getting vaccinated.
